

**MONMOUTHSHIRE COUNTY COUNCIL**

**HIGHWAYS ACT 1991**

**LICENCE UNDER SECTION 171 – EXCAVATION IN A PUBLIC HIGHWAY**

**GUIDANCE NOTES FOR APPLICATIONS FOR A S171 LICENCE**

It is essential that applicants for a licence under the above legislation make themselves aware of all the requirements of the Highways Act 1980 and the New Roads and Street Works Act, 1991, the associated Regulations and Codes of Practice. Non compliance with the Regulations and the Act can in some circumstances result in criminal offences being committed and the licensee on summary conviction is liable to a fine not exceeding Level 3 on the standard scale for each offence.

The applicant's attention is particularly drawn to the following:-

1. Safety Measures: Signing, guarding and lighting during the works must comply with Section 65 of the NRASW Act 1991 for which a Code of Practice has been published.
2. Qualifications of Supervisors & Operatives: The works must be carried out by persons holding prescribed qualifications in accordance with S67 of the NRASW Act 1991 and the associated regulations.
3. Affect on Other Apparatus in the Street: The licensee must ensure that the reinstatement complies with the specification for the whole of the guarantee period in accordance with the Act and the Monmouthshire County Council "Trench Reinstatement Specification" drawing.
5. Inspection Fees & Recovery of Costs: The licensee will be liable for the costs as defined in the Act and the associated Code of Practice for Inspections. Licensee shall pay the Street Authority in connection with the grant of the licence the fee of £415.00 made up as follows:-
  - (i) £135 Administration fee
  - (ii) £80 Capitalised fee in lieu of annual charge
  - (iii) £200 Inspection fee for each 200m length, or part thereof

Certain other costs may also pass to the licensee for such items as traffic diversions, temporary traffic orders, damage and losses caused by the works.

**Continued over....**

6. Record of Apparatus/Excavation: The licensee should note the requirement to keep records of the apparatus/excavation as stated in Section 79 of the NRASW Act 1991.
7. Street Authority Powers to Direct as to Timing of the Works: The licensee should be aware that he may be directed to carry out works at specific times under Section 56 of the NRASW Act 1991.
8. Unnecessary Obstruction: The licensee should be aware of the need to avoid unnecessary obstruction as required by the Section 66 of the NRASW Act 1991.
9. Unauthorised Street Works: It is an offence to carry out Street Works without a street works licence or a statutory right - see section 51 of the NRASW Act 1991.
10. Special Streets: Certain streets have been designated with special conditions to control street works. The licensee must ensure that any works comply with these conditions.
11. Person Aggrieved: Where the apparatus in respect of which an application for a Street Works Licence is made to the Street Authority, a person aggrieved by:
  - (a) the refusal of the Authority to grant a licence.
  - (b) their refusal to grant a licence exempt on terms prohibiting its assignment or
  - (c) any terms or conditions of the licence granted to him may appeal to the Secretary of State.

The relevant documents explaining the details of the above legislation, available from HMSO are as follows:-

1. The New Roads and Street Works Act, 1991.
2. The New Roads and Street Works Act, 1991. Code of Practice for the Co-ordination of Street Works and Works for Road Purposes and Related Matters.
3. The New Roads and Street Works Act, 1991. Specification for the Reinstatement of Openings in Highway.
4. The New Roads and Street Works Act, 1991 - Code of Practice for Inspections.
5. The New Roads and Street Works Act, 1991 - Code of Practice on safety at Street Works and Road Works.
6. Highways Act 1980.
7. To be continued as documents are published.

**Please note new conditions of Section 171 licence:**

A bond payment is also required on application to indemnify the Authority against substandard workmanship. A fee of 20% of the estimated cost of the works will be required; this can be paid via cheque or card. It will then, depending on depth, be released after 2 years of excavation if less than 1.5m deep or 3 years if over 1.5m deep. Alternatively, a Surety Bond will be accepted.

**MONMOUTHSHIRE COUNTY COUNCIL  
HIGHWAYS ACT 1980**

**APPLICATION TO EXCAVATING IN THE PUBLIC HIGHWAY**

**SECTION 171**

I hereby apply for a licence to make an excavation within the highway as the owner for the time of the excavation.

Consent will be issued subject to my undertaking to comply with the Standard Codes of Practice referred to in the Highways Act 1980 and the New Roads and Street Works Act 1991 and to Part III and Schedule 3 of that Act.

**Please tick**

i	I understand that no works must be undertaken before a licence is signed and completed.	<input type="checkbox"/>
ii	I agree to pay a licence fee for the sum of £415.00 for trenches up to 200m, (an additional payment of £200 is required for every 200m thereafter) and <b>enclose a cheque with this application for the amount.</b>	<input type="checkbox"/>
iii	I agree to provide signing and traffic management to the works in accordance with Chapter 8 of the Traffic Signs Manual.	<input type="checkbox"/>
iv	I agree to conform to the specification requirements as detailed in the "Trench Reinstatement Specification" drawing.	<input type="checkbox"/>
v	I agree to carry out the works between the hours specified by the Highways Network Manager.	<input type="checkbox"/>
vi	I agree to notify the Highways Network Manager 1 month before the commencement of works in order to co-ordinate the works and book the road space accordingly.	<input type="checkbox"/>
vii	I enclose 2 No plans scale 1/2500 or greater showing clearly the highways affected and the line and position of work I wish to execute.	<input type="checkbox"/>
viii	I agree to notify all other undertakers one month before the commencement of works and to obtain location plans for each utility, to identify the location of their apparatus. <b>*copies of plans to be enclosed with your application*</b>	<input type="checkbox"/>
ix	I confirm that I have obtained the consent or permission of the owner of any apparatus to which any connection is to be made and <b>enclose proof of confirmation.</b>	<input type="checkbox"/>
x	I agree to notify residents affected by letter drop; <b>a copy is enclosed.</b>	<input type="checkbox"/>
xi	<b>I enclose copies of qualified supervisors and operatives 'Street Works Qualifications Register' cards (front &amp; back)</b>	<input type="checkbox"/>
xii	<b>I enclose proof of Public Liability Insurance.</b>	<input type="checkbox"/>
xiii	<b>I enclose a method of work statement.</b>	<input type="checkbox"/>
xiv	I agree to pay a further £125.00 to inspect, repair or replacement of the said apparatus, where a Section 171 is already in existence.	<input type="checkbox"/>
xv	<b>I enclose the completed application form.</b>	<input type="checkbox"/>

I confirm that I have read and understand the application and agree to comply with its requirements

Signed ..... Printed..... Date.....  
(The Applicant)

## **COMPLETING THE FORM PART R1**

- **TO** – This form should only go to the street or road works authority. There is no requirement to register completed works with other undertakers.
- **PART N SENT?** – If the authority has already been notified of the works, the answer to this will be ‘Y’. In the case of minor works in “non traffic sensitive situations”, the answer will be ‘N’.
- **ALL WORKS IN THIS NOTICE COMPLETED? Y/N** – This should only answered ‘Y’ if the works, including **all** of the permanent reinstatement works, have been completed. In effect this closes the notice.
- **IF ‘Y’ ACTUAL INSPECTION UNITS** – This should only be completed if all the works are totally complete. Inspection units are:-

One Inspection Unit

= Up to 5 excavations if:

- Made within 10 days;
- Within a range of 500 metres
- The aggregate length is less than 200 metres in length

Or

= 200 metres of a trench or part therefore.

Barholes used to detect gas leaks do not count as excavations for the purpose of inspection **unless** no other street works are carried out on the site.

For the large majority of minor works the number inspection units will be 1.

The number of inspection units is not directly related to the number of reinstatement entries on the registration form as, for example, a single excavation may straddle two surfaces as a result of which, for the purposes of registration, it will appear as two excavations. Case must therefore be taken in calculating the number of inspection units and this can only be done accurately on site.

- **LOCATION** – This will be the same as the location given on the notification form (Form Part N)
- **REINSTATEMENT CLOSING DIMENSIONS** – Each reinstatement should be entered against an item number. If further reinstatement is made, for instance if an interim reinstatement is made permanent at a later date, then each item of reinstatement must be re-entered against the same item number as on the previous Form Part R. This ensures that, at any time, the latest registration form represents the status or “whole life” of the works.
- **LOCATION** – This should be sufficiently detailed to allow the reinstatement to be identified on site. In most urban areas the house number and street will suffice.

- **LENGTH AND WIDTH** – Measurements should be expressed in metres to one decimal place.
- **SURFACE** – The surface will be footway, carriageway or verge.
- **DEEP EXCAVATIONS** – Where an excavation is more than 1.5 metres deep a 'Y' should be entered in the column 'Deep Ex'
- **GUARANTEE START DATE** – This is the date on which the completed R1 Notice is returned to the street or road works authority; for completed reinstatement, whether interim or permanent.

**PORTABLE TRAFFIC SIGNALS FORM**

**Kelly Santaana/Stacey Harris**  
**Street Works Section, Monmouthshire County Council, Raglan Depot, Station Road,**  
**Raglan.**  
**NP15 2ER**

## Road Running Surface

**Figure A2.1** – Typical Reinstatement Structure within recognised Road Designs.

- 2) Permitted materials and layer thickness for road structures are specified as follows.
  - a) Flexible Design see Appendix A3.0 to A3.4
  - b) Flexible Sub-structure see Appendix A3.5
  - c) Composite Design see Appendix A4.0 to A4.3
  - d) Composite Sub-structure see Appendix A4.4 to A4.5
  - e) Rigid Design see Appendix A5.0 to A5.2
  - f) Modular Design see Appendix A6.1 to A6.3
- 3) All layer thicknesses are in millimeters

### A2.8.2 Footway, Footpath and Cycle Track Structures

- 1) For the purpose of defining permissible material options, layer thickness, etc., this Specification classifies footway, footpath and cycle track structures as being of flexible, rigid or modular design. The structures assumed to be representative of each of these designs are shown in Figure A2.2. For each design, a typical reinstatement structure, identifying the principal structural layers, is also shown.
- 2) Permitted materials and layer thickness for footway, footpath and cycle track structures are specified as follows:
  - a) Flexible Design            see Appendix A7.1
  - b) Rigid Design                see Appendix A7.2
  - c) Modular Design            see Appendix A7
- 3) All layer thicknesses are in millimeters.
