

## Corporate Plan Performance Measures

The corporate plan shows some of the measures we will use to assess our progress. These are a mix of process, output and outcome measures. In short: Did we do it? Did we do it well? Are people better off as a result? When we are dealing with complex issues it isn't always easy to measure progress quarterly or annually in a single number. In the plan we've highlighted some of the more accessible metric and milestones but behind all major programmes of activity we have a separate project plan or service business plan.

The table below provides the performance measures set and includes; the direction of travel aimed for over the period of the Corporate Plan, the latest full year data, which is mainly full year 2018/19 data or equivalent for each measure, and the specific target set for the current year 2019/20.

Description	Direction aimed for	Latest	Target 2019/20
