To whom it may concern,

Transport for Wales (TfW) supports the wider principal of the proposals as set out in the Stakeholder Consultation Report (June 2024) and discussed on 10th July 2024 for the inclusion of the Abergavenny East strategic site within the MCC Deposit Plan RLDP. TfW will continue to work collaboratively with MCC, NR, WG and other delivery partners towards securing high quality and integrated active travel connections over the railway line and across the A465. This will be on the basis of protecting or enhancing TfW Rail Infrastructure and Operations including safety, revenue and customer experience.

Yours sincerely

**Strategic Development Programme Manager for Cardiff Capital Region
Metro, Transport for Wales**
