Dear Mr Matthews,

Inclusion of the Abergavenny East site in the Monmouthshire Replacement Local Development Plan (RLDP)

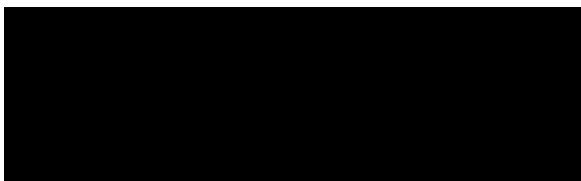

Further to discussions regarding the above and as the highway authority for the A465 trunk road, we offer support towards concept proposals for the Abergavenny East Site.

Outline proposals align with both local housing need and the principles of the Wales Transport Strategy.

For the site to be appropriately planned and developed in line with current best design practice, we accept that there will be a requirement for changes at this section of the A465. These should accord with the various statutory Acts and maintain the standards of the Design for Manual Roads and Bridges.

We do however look forward to working with stakeholders and playing a part in facilitating a vision that will see the Abergavenny East site brought forward in the RLDP for future delivery.

Yours sincerely

Head of Operations - Transport
